

## Milestone 7

### Title:

Paradise News

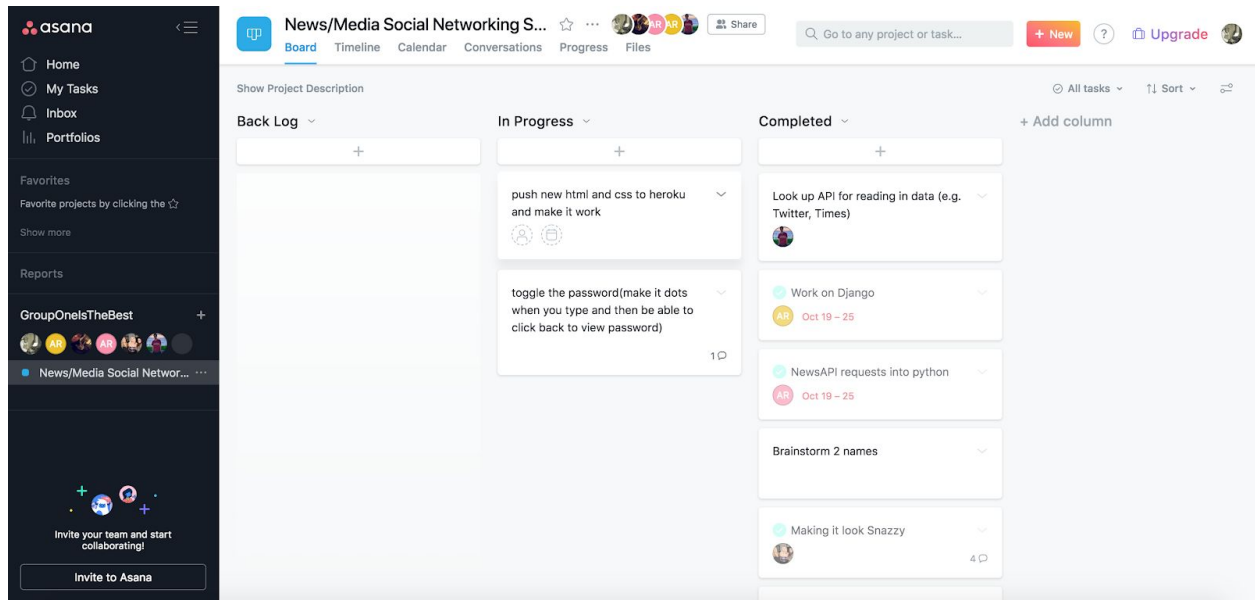

### Group Members:

Jared Gorthy, Bing Mitchell, Danny Niquette, Virginia Claire Olmstead, Adam Rosa, Austin Rowen

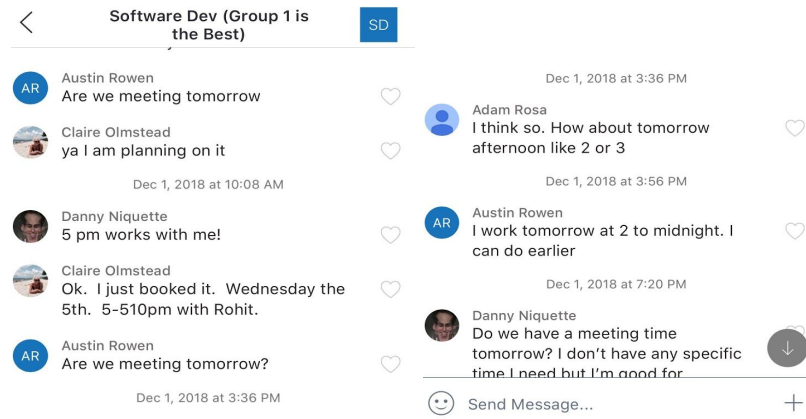

### Project Tracker:

For our project, we used Asana and GroupMe. Below we have a link to our Asana Board, although there isn't much activity past the first couple weeks. This is because we found it much more effective to display our progress and goals through GroupMe. We have attached pictures of each.

- Link to project tracker: <https://app.asana.com/0/851773943418711/board>
- Screenshot of project in project tracker:

Screenshot of our GroupMe chat, displaying how it allowed us to collaborate:

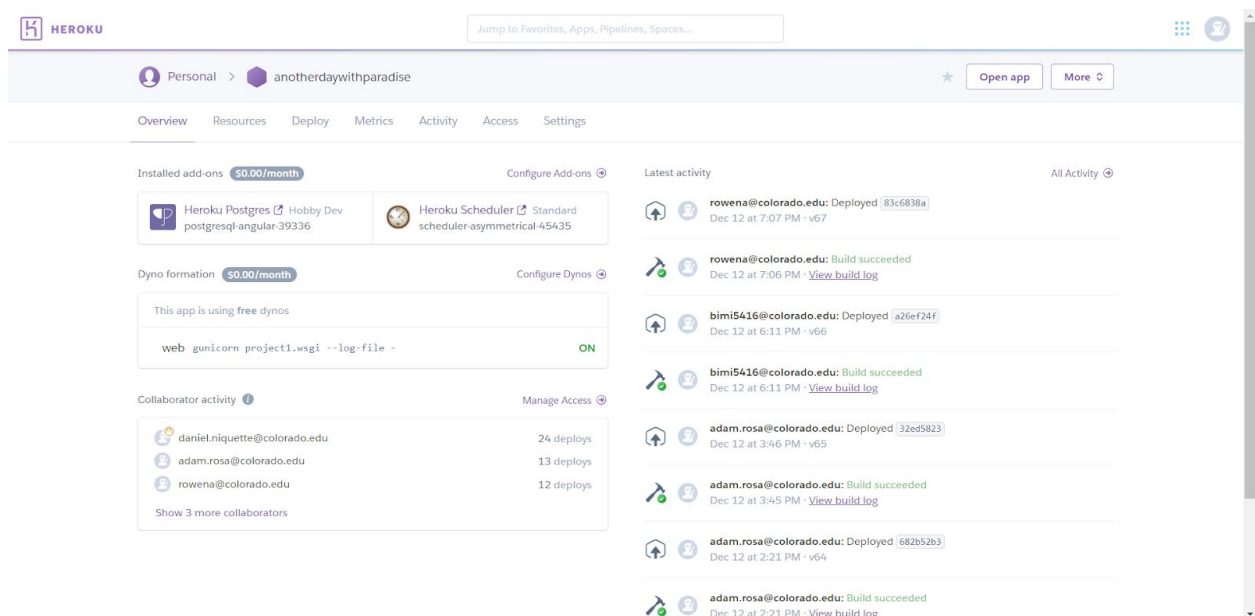

## VCS:

We used Github to store all of our source code and test plans. In the attached repository, you can also find our README.md, which gives a brief overview of our project.

<https://github.com/DNiquette16/ParadiseNews>

We also used Heroku's 'rollback' feature a number of times, in order to restore our project to a version that worked. It also allowed us to see when other group members were deploying, so we thought it fit to include this as well. Attached below is a screenshot of the dashboard, showing the features we mentioned.

<https://dashboard.heroku.com/apps/anotherdaywithparadise>

## Contributions:

Below is a screenshot of each member's contribution throughout the semester. A complete record can be found on Github, here:

<https://github.com/DNiquette16/ParadiseNews/blob/master/semester.log>

```
25 commit b15fa2e0cbe59afdc34ea69b770809d5048a41
26 Author: austinrowen1 <austin.rowen@colorado.edu>
27 Date: Wed Dec 12 13:10:41 2018 -0700

100
101     make account, login, and logout functionality added
102
103 commit 2258f67f94af110579f268141c454e5d3233fc57
104 Author: DNiquette16 <DNiquette16@gmail.com>
105 Date: Wed Dec 5 18:38:15 2018 -0700
106
107     Please use the correct picture
108
109 commit 2d0b6910ffd4108cff94348329a58cde4a80f051
110 Author: Adam Rosa <adam.rosa@colorado.edu>
111 Date: Wed Dec 5 18:25:35 2018 -0700
```

## Deployment:

You can simply deploy our app through Heroku, attached below is a link to deploy:

<https://anotherdaywithparadise.herokuapp.com/>
